公司簡介

Founded in 1989, **TELE-PAPER** has over 30 years of experience in thermal paper industry and grown into one of the largest in thermal, carbonless and woodfree paper manufacturers and exporters in Southeast Asia. As a subsidiary of Oji Group Japan, we take pride in our capabilities to produce quality papers that are well-known and chosen globally.

Our local subsidiary company **SONOFAX SDN. BHD.** has been supplying to over 500 major corporations in Malaysia. Our key competency is assisting our customers to achieve significant cost saving with high quality products through bulk purchase and utilisation of new technologies.

We provide one stop solution for exceptional speciality imaging paper and office consumables. Our main production lines include the manufacturing & printing of **THERMAL AND WOODFREE PAPER, THERMAL TRANSFER RIBBONS, MEDICAL PAPER, MEDICAL GELS AND SANITISATION PRODUCTS.** We also provides customised security features to overcome fraud and to authenticate genuine documents.

In our bid to stay ahead of the industry locally & internationally, all the resources of the company is focused on giving steadfast dedication to quality, efficiency, flexibility and customer satisfaction. Please contact our sales personnel for assistance or enquires.

Quality Policy

Our company is committed to providing continuous improvement in total customer satisfaction on quality products and on time delivery. We provide safe, quality products which meet customers' and regulatory requirements.

ISO 9001:2015 & ISO 13485:2016

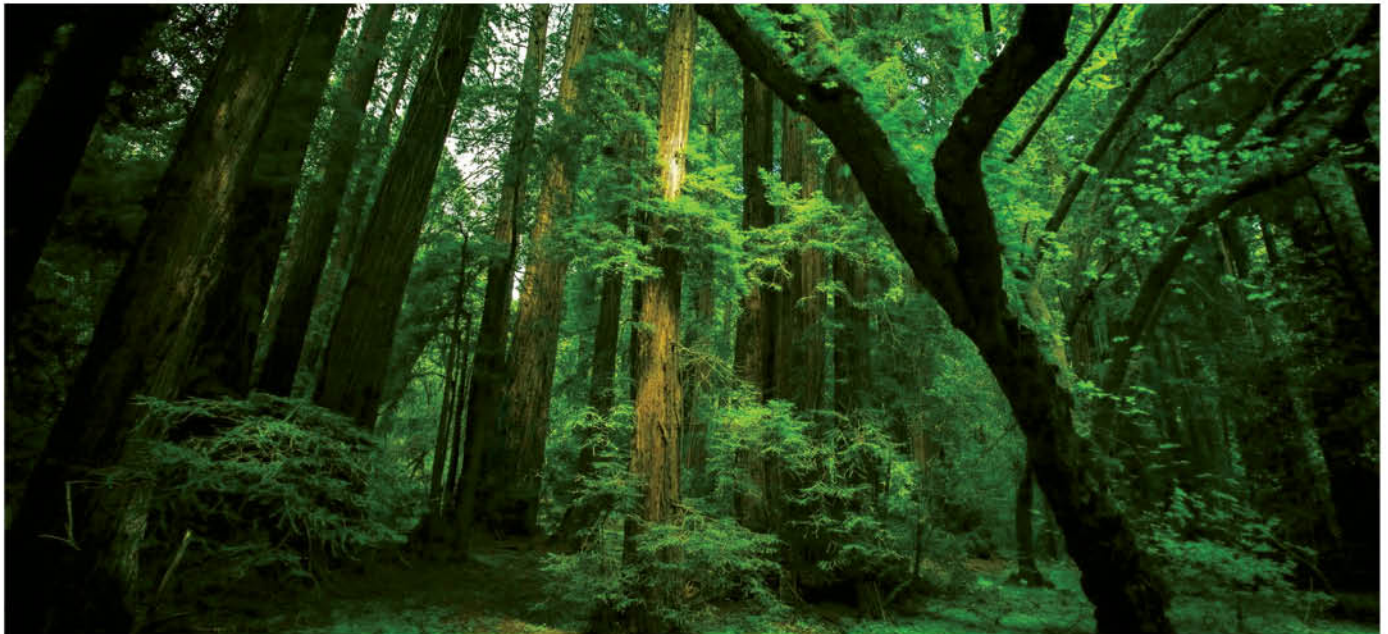

Awarded by TÜV Rheinland, it is an internationally recognised certification which specifies requirements for a quality management system where an organisation needs to demonstrate its ability to consistently provide products that meet customer and applicable statutory and regulatory requirements.

Both certification aims to enhance customer satisfaction through effective application of the system, including processes for continuous improvement of the system and assurance of conformity to customer and applicable statutory and regulatory requirements.

We Care For The Environment

Forest Stewardship Council® (FSC®)

The FSC is an international, non-profit, multi-stakeholder organisation established in 1994 to promote responsible management of the world’s forests. Its main tools for achieving this are standard setting, certification and labelling of forest products; one of which is the Chain-of-Custody certification. Via its Chain-of-Custody process, FSC ensures consumers that the FSC-certified products they purchase are coming from responsibly managed sources.

Tele-Paper is dedicated to supporting sustainability and capable of providing FSC certified products. Through rigorous adherence to strict standards and independent audits, we ensure that our range specifically paper products meet the principles set forth by the FSC. By choosing our FSC-certified goods, customers not only fulfil their business needs but also actively contribute to global forest preservation. Each purchase represents a commitment to sustainable forestry practices and environmental stewardship, making a positive impact on future generations.

SCS Global Services does hereby certify that an independent audit has been completed and conformity to the applicable standard(s) has been confirmed for:

Tele-Paper (M) Sdn. Bhd. & Sonofax Sdn. Bhd.

Lot no. 1, Jalan Sejahtera, 25/124, Axis Premier Industrial Park, Section 25, Shah Alam, Selangor 40400, Malaysia
 Lot 2c, Jalan Keluli 15/116, Section 15, Shah Alam, Selangor 40400, Malaysia (SCS-COC-003721-B)

This single chain of custody certificate covers the conversion and distribution of paper using the transfer system.

The facility(s) are hereby Chain of Custody certified to sell products as:
FSC Mix; FSC 100%; FSC Recycled

The assessment has been conducted by SCS Global Services in accordance with the protocols of the Forest Stewardship Council® A.C. (FSC®).
 FSC Standard: FSC-STD-40-004
 Certificate Code: SCS-COC-003721 Trademark License Code: FSC-C105797

Valid from: 26 April 2021 Expiry date: 25 April 2026

This certificate itself does not constitute evidence that a particular product supplied by the certificate holder is FSC-certified (or FSC Controlled Wood where applicable). Products offered, shipped or sold by the certificate holder can only be considered covered by the scope of this certificate when the required FSC claims clearly appear on sales and delivery documents. The scope of this certificate is considered accurate on the date of issuance. The current validity and scope, including the full list of products, shall be verified on info.fsc.org. The certificate shall remain the property of SCS, and this certificate and all copies or reproductions of this certificate shall be returned to SCS immediately upon request. Where a certificate covers more than one site, the covered products and processes activities are performed by the network of Participating Sites, and not necessarily by each of them.

The mark of responsible forestry

Counterfeiting And Forgery Prevention

Even in today's hi-tech digital age, forgery continues to proliferate and cause massive losses to organisations; big and small sized alike. Counterfeiters are constantly finding new ways of escaping detection, making it an uphill challenge to keep those with criminal intent from being caught.

Over the years, we have developed unique solutions to make counterfeiting more difficult. With increasingly complex printing being used on paper and documents, our technology is unique unlike any other; more importantly, it works against forgers!

Why Do I Need Security Measures?

Most companies are reluctant to reveal the impact of forgeries in order to protect their reputation. To be one step ahead of the forgers, we use a combination of security features to make our products almost forgery proof.

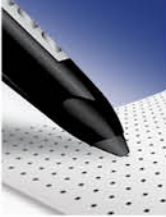

Which Security Application Is Suitable For You?

	<p>Micro Coding</p> <ul style="list-style-type: none"> • Micro coding on cash vouchers 		<p>2D / 3D Barcode</p> <ul style="list-style-type: none"> • Input multiple information • Almost impossible to duplicate for fraud prevention
	<p>Microtext / Microprint</p> <ul style="list-style-type: none"> • Printed in microtext (small hidden fonts) 		<p>Hologram / Foil</p> <ul style="list-style-type: none"> • Hologram / foil on the cash / gift voucher
	<p>Invisible Photocopy Mark</p> <ul style="list-style-type: none"> • Invisible photocopy mark for easy verification • Only can be seen after photocopied 		<p>Scratch Reactive Ink</p> <ul style="list-style-type: none"> • An invisible security ink layer which becomes visible only when the surface/image is scratched
	<p>UV Invisible Mark</p> <ul style="list-style-type: none"> • Printed with logo, text or some illustration that can only be visible under UV light 		<p>Security Water Mark</p> <ul style="list-style-type: none"> • With security water mark company logo • Can be invisible or semi-visible

Security Method

The strongest protection against forgery is achieved by using a combination of the following methods:

A) Applied On Paper

i) Micro Coding

Encrypted documents can only be decoded by a firmware programmed onto a handheld security IR Reader with audio verification.

ii) Microtext / Microprint

Involves printing very small text, usually too small to read with the naked eyes, onto the paper.

iii) Invisible Photocopy Mark

Invisible to the naked eyes. When photocopied or scanned, this invisible addition becomes visible and very noticeable.

iv) Invisible UV Mark

Printed invisible images only visible under UV light.

v) 2D / 3D Barcode

Utilises a combination of encoded characters to provide optimum document authentication that is almost impossible to duplicate.

vi) Hologram / Foil

Provides an authentication mark on a product, making it more difficult for counterfeiters to produce fake ones.

vii) Scratch Reactive Ink NEW

An invisible security ink layer covers any printed element, text or graphic. Exposed only by scratching the ink with a coin or other metal object.

B) Applied Inside Paper

ii) Security Water Mark

To verify whether the document is an original, hold it up against light to view the water mark. *(Minimum paper weight required: 80gsm)*

Each security method has a unique characteristic that can be identified by a variety of ways ranging from sight or touch, to the use of a simple checking device or high tech equipment.

The appropriate security measure(s) depends on the end user's application.

Paper Type Per Security Feature

Paper Type	Security Feature							
	Micro Coding	Microtext/ Microprint	Invisible Photo-copy Mark	UV Invisible Mark	2D / 3D Barcode	Hologram / Foil	Scratch Reactive Ink	Security Water-mark
Thermal	✓	✓	✓	✓	✓	✓	✓ <i>(Uncoated side)</i>	-
Woodfree	✓	✓	✓	✓	✓	✓	✓	✓
Artpaper	✓	✓	✓	✓	✓	✓	✓	-

* One or more security features can be incorporated

Please contact our sales department for further information on paper grades, individual solutions and security features.

** All specifications are subject to ± 5% of International Standard Deviation.**

Many of the everyday activities we engage in such as, parking the car at the shopping mall, to catching the latest action movie at the cinema, or attending a concert or event; require the use of a ticket.

By utilising the latest technologies in printing machineries coupled with sound technical knowledge of the industry (including the option of incorporating various security features to safeguard against counterfeiting and forgery), Sonofax not only can meet, but exceed your ticketing requirements for the following applications:

01

**THERMAL , WOODFREE &
NON-CARBON REQUIRED (NCR)
PAPER ROLL**

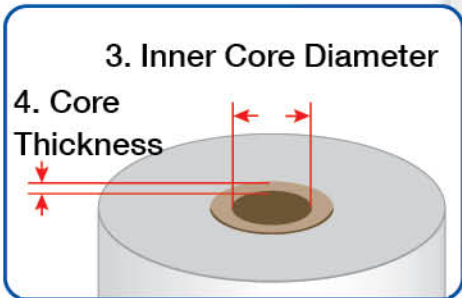

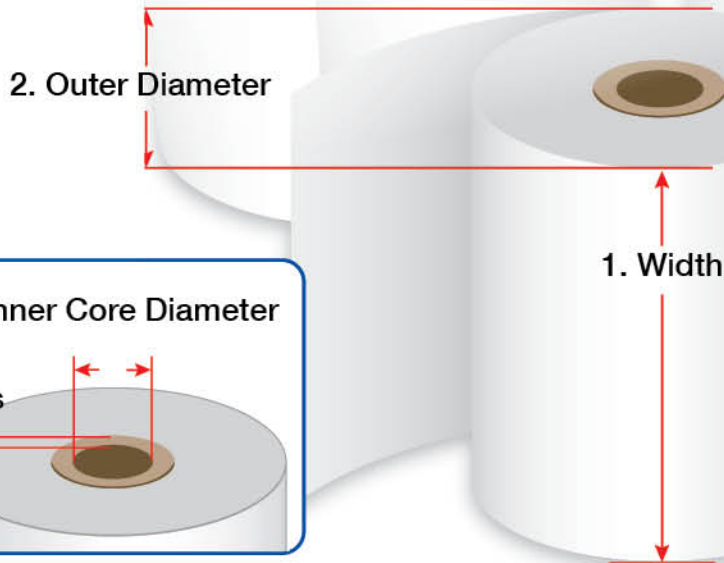

PLACING AN ORDER FOR PAPER ROLL

订购纸卷

For thermal, woodfree & NCR paper roll enquiries, please provide the following details:

1. Width (mm)
2. Outer diameter (mm) / roll length (m)
3. Inner core diameter (mm)
4. Core thickness (mm)
5. Core Type - paper, plastic, or coreless
6. Paper weight (gsm)
7. For thermal paper - coated side in (CSI) or coated side out (CSO)

6. Paper weight range from 48gsm to 180gsm.

Free End Roll
Paper rolls are wound free end without glue or tape to prevent printer paper jam at the end of the roll.

Paper Roll Packing
All paper rolls are packed in transparent shrink wrap (10 rolls per pack) for easy viewing of the roll & core diameter and also to protect the rolls from moisture, water & dust.

Carton Box Printing
Each box is printed with lot / batch number, date of production, weight and paper grade.

Barcode Label
Each box is printed with barcode label for better inventory control.

Side of Roll Marking (Optional)
Inkjet Printing On Diameter Side

* Company has the right to change any standard packing without prior notification.

1. Convenient and Time Saving:

User can replace new roll into the printer without removing and disposing the core, saving time and enhancing cashier productivity especially during peak hours.

2. Environmental Friendly

No core to dispose.

Why Go Coreless?

If opt for same diameter roll with current purchase:
5. Longer Paper Length

By replacing the core with paper, the paper length is much longer (10 – 35% longer depends on paper roll size), hence less frequent need to change the paper roll, saving time and enhancing cashier productivity especially during peak hours.

If opt for same paper length with current purchase:
3. Save Transportation Cost

The size per carton box is much smaller and lighter, hence savings in transportation cost. For overseas shipping, the container shipping and delivery cost will also be significantly cheaper.

If opt for same paper length with current purchase:
4. Save Storage Space

Smaller diameter of paper rolls translate to smaller carton box, thus smaller storage space. Most cashier areas have limited storage space, by having smaller box, storage space is greatly reduced.

Customised Start & End Mark

定制始段与尾段标记卷

Printed either face out or face in, the start and end mark serves as an indicator of the portion of the paper to tear off before use and when the end of the roll is approaching.

Designs can be customised according to the end user's or dealer's requirements depending on their objective such as, to distinguish between different outlets for the end-user, or as a subtle reminder to end-users to call the dealer to re-order.

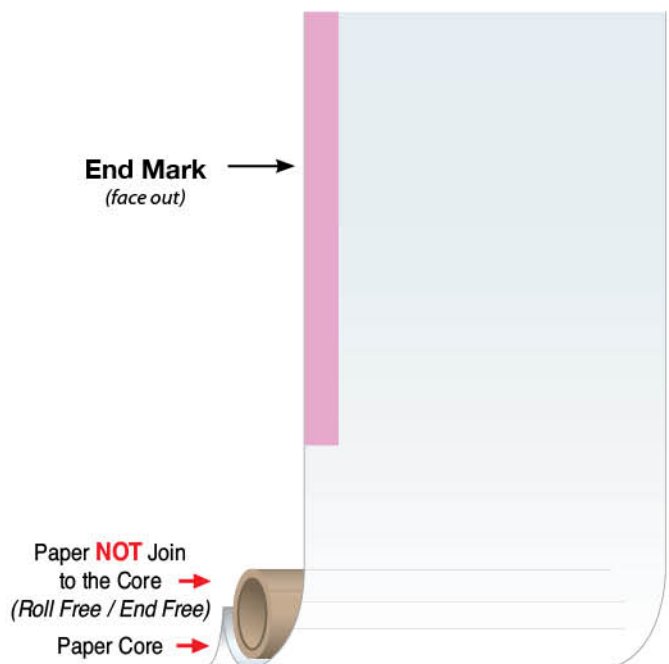

Start & End Mark
(face out)

Standard End Mark

标定尾段标记卷

To indicate to the user that the paper is approaching the end of its roll. Applicable to all paper rolls (thermal, woodfree & NCR) without customised end mark.

1. Receipt saving concept :

By customising the pre-printing of receipts, We have enabled many companies to save paper cost and reduce paper usage significantly.

2. Prevent pilferage :

With 1 colour printing on our customer's paper roll, this can prevent the paper rolls from being easily stolen as compared to blank rolls since most customers do not keep track of their paper roll inventory.

Why is it important to customise your receipt?

3. Improve company image :

Personalise your receipt with company logo, brand name, business hours, total number of outlets and addresses, or even add promotions to improve your company image while generating more business.

4. Need for authentication :

Cheque deposit receipts, kiosk printouts, transportation tickets, entertainment tickets and retail, food & beverage receipts are customised and pre-printed for authentication and tax purposes. More and more corporates and retailers are using pre-printed receipts to reduce fraud cases and are especially useful when it comes to goods exchanges and refunds.

5. Communicating with the customers :

Advertise your new products or upcoming events, announcing new and upcoming promotions or new outlet opening.

We have more than 10 Standard Templates that would meet most customer's requirements, Or, simply email us your artwork to find out more.

CUSTOMISED PRE-PRINTED PAPER ROLL

We are capable of offering pre-printing up to 8 colours across a wide range of thermal, woodfree, artpaper, and carbonless paper rolls to suit your specific needs. Our thermal paper ranges from standard, long life, BPA free, FSC-certified, synthetic, top coated, high sensitivity, high image density and blue image available with either choice of coreless, paper, or plastic core. Customized sizes and packing are also available.

Distinguish yourself

In today's ultra competitive business environment, paper roll has gone beyond its original purpose as a receipt. It also serves as an effective advertising and promotion medium for businesses. Receipts have become a medium to communicate information about products/services and boost brand name recognition to the public/consumers.

Understanding the importance for businesses to stand out from competition, Sonofax's Tinted / Coloured Paper Roll gives you the competitive edge and distinguishes you from your competitors.

Characteristics

- Colourful and attractive
- More than 100 colours to choose from
- Available in glossy look

Benefits to Dealers

- **Offer more choices for end users to choose**
Dealers can now include Tinted/Coloured paper roll as part of their product range, thus providing more options for end-users to choose from.
- **Opportunity to increase revenue and profit**
Ideal recommendation for end-users, who do not mind paying extra for something attractive and effective in differentiating themselves from others, thus allowing dealers to sell at higher profit margins.
- **Avoid losing potential end users**
Better option for end-users who want exclusive and unique identity for their paper rolls and minimise the possibility of losing sales to competitors.
- **Unique Selling Proposition**
Unique features allow dealers to compete more effectively through product differentiation and make end-users purchase from them rather than from competitors. Allows dealers to focus selling based on quality rather than on price alone.
- **Opportunity for repeat sales**
Once the end-users are convinced to use Tinted/Coloured paper roll, the chances of them changing to another supplier is low due to effort and time spent in developing, checking and approving of colour.
- **Contract sale**
Due to minimum order quantity (MOQ), most end users are tied to a contract for a period of time.

Benefits to End-Users

- Able to differentiate outlets, months, departments, territories, promotional / non-promotion period
- Creates a unique identity
- Increases awareness on promotions more effectively
- Projects a premium image and boosts brand name recognition
- Prevents internal pilferage - stock loss
- A form of control and monitoring system to ensure retailers and/or franchisees use approved receipt rolls

BLANK THERMAL PAPER ROLL

Sono-Roll 10 Years Long Life Thermal Paper Roll

10年高级热敏纸卷

BLANK PAPER ROLL
Thermal | Woodfree | NCR

ADVANTAGES

- Image on receipts will not fade or blur easily. Ideal for future tax audits
- Good for long image retention for applications such as GST/ tax receipts
- Image does not fade as quickly as normal thermal paper under hot or humid environment
- Darker and clearer printouts make it easy to read even in low light conditions
- Keep important documentations for a longer period of time e.g. tax auditing and reconciliation purposes
- Save time and money (no more photocopies)
- Don't buy cheap, buy value

Special Start Mark

- Characteristics:**
- Up to 7, 10 & 12 years image durability*
 - Data on receipts will not fade or blur easily
 - Very sharp and dark image density up to 1.6 dE and above (no white spots)
 - Excellent protection against environmental factors
 - Super smooth paper surface
 - Less paper dust, hence longer printer head life
 - Excellent barcode scannability

LABEL

Direct Thermal | Thermal Transfer |
Label Sticker

Label
标签

Labels play an important role in providing information, barcoding, instructions for use and identifying a product, manufacturer, destination or origin. We offers a range of direct thermal and thermal transfer label solutions with specific characteristics for end-user applications. The end-user's industries include manufacturing, healthcare, retail, logistic, transportation, food & beverage and others.

The labels can be supplied in roll, fan fold and sheet form. Depending on your application, label size, die cut, perforation and pre-printing can be customized.

FEATURES

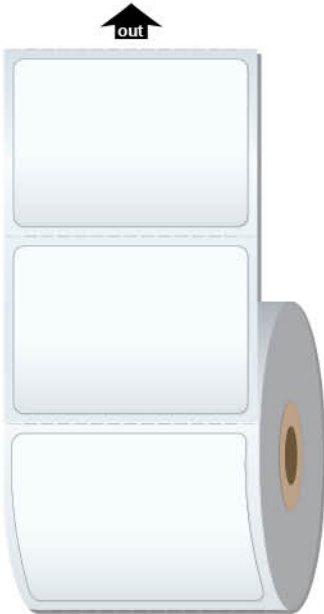

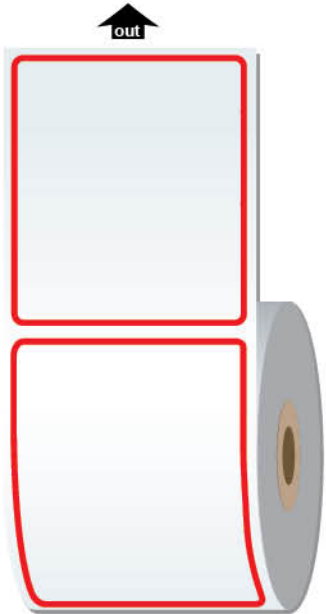

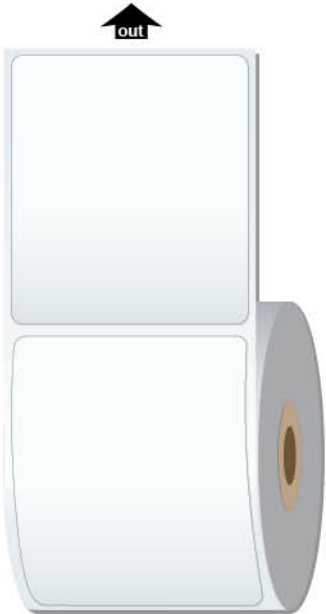

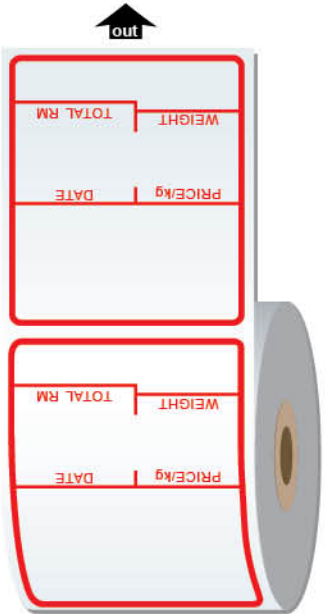

- 1D or 2D barcode readable – sharp & clear
- Very smooth and super white paper with high sensitivity thermal coating, thus, able to protect print head with high speed printing
- The glassine release liner makes auto-labelling process workable
- Pre-printing up to 8 colours

Direct Thermal Label

直接热敏标签

1. Non-Top Coat Thermal Paper Grade with water resistant

Recommended for applications where wet rub and water resistance to thermal image as well as pre-printed ink is required, but does not include resistance against environmental exposure and chemicals.

2. Top Coat Paper Grade with multi resistant

Best applied when surface abrasion is a concern. Excellent resistance to heat, oil, alcohol, water, light, plasticizer and abrasion.

3. Top Coat Synthetic Paper Grade with multi resistant (Specially designed for tear resistance and full water proof)

Recommended for applications where wet rub and water resistance to thermal image as well as pre-printed ink is required, but does not include resistance against environmental exposure and chemicals.

For direct thermal label no 1 & 2 we have option to laminate the paper with PP (Polypropylene) film for added tear resistance

Thermal Transfer Label

热敏转色标签

THERMAL TRANSFER LABEL	
Art Paper Grade	Simili Paper Grade
Art paper is the most often used label material in the market. It has a glossy appearance with smooth surface.	Simili paper is an ordinary paper and least expensive label material. Recommended for matt, soft and subdued look.

In addition to the materials mentioned above, we also supply alternative thermal transfer base materials such as polyester, cenic yupo and mirrorkote upon request. Please contact us for more details.

04 COMPUTER FORM

Pre-Printed | Blank

Advantages of Our Computer Form

THE CLEANEST COMPUTER FORM

Lowest Dust & Dirt

- The cleanest computer form
- Lowest dust and dirt content for a cleaner printer and office environment
 - Reduce health risk from breathing in paper dust
 - Detailed information labeled on box
 - 4 sides open carton
 - Strapping band

Non-toxic chemical coating on paper

Paper dust removed from every sheet

Micro perforation for easy tearing

Round clean cut holes, no jam

Image sharp & clean up to 7 ply

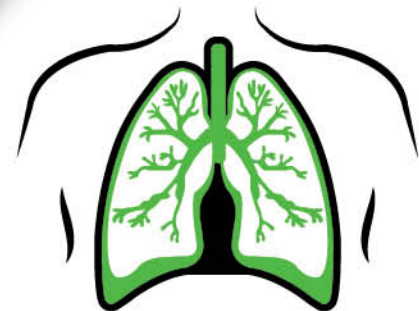

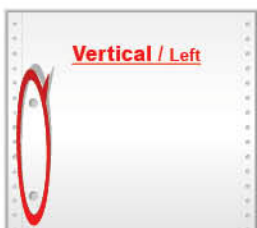

Choice of Blue & Black image

Barcode label, better inventory control

COMPUTER FORM
Pre-Printed | Blank

PRE-PUNCHED HOLES FOR FILING

Reduce Health Risk from Paper Dust

Pengurangan risiko habuk pada kesihatan

减少灰尘带来的健康风险

Consignment Note

托运单

ADVANTAGES

- Clean cut side hole, no jamming
- Dust / dirt removed for a cleaner printer & office environment
- Die-cut with different colours
- Printing up to 9 colours
- With option of semi glossy ink (whole artwork)
- Good image carbonless paper up to 7 ply
- Minimum de 0.5 optical density on every ply's image
- Serial numbering and barcode printing with computerised and QC checking (300dpi up to 600dpi)
- Barcode is water resistant (wax layer not required)

BACK GLUING OPTIONS

- Variable sizes on back glue / customization available
- Normal glue for standard adhesion strength
- Super glue for higher adhesion strength

Pre-Printed Envelope Mailer Form (Payslip)

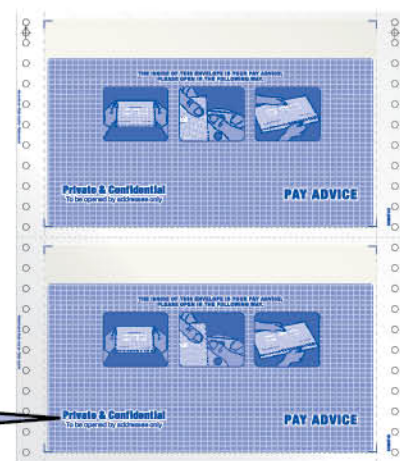

预印薪金封

ADVANTAGES

- Improve company image with pre-printed payslip (mailer) compared to blank payslip
- Blue background - more attractive & neat compared to black background
- Image sharp & clear
- Easy to tear
- No jamming, very precise hole punching
- Dust / dirt removed for a cleaner printer & office environment

PRINZET INKJET PHOTO PAPER

Inkjet Photo Paper Advantages

喷墨打印相纸特点

ADVANTAGES

- Suitable for use on all brands of inkjet printers such as Canon, Epson, HP, Lexmark and Brother
- Colourful packaging for attractive display. Easy to differentiate the type of inkjet / inkjet photo paper based on the packaging colour. e.g. blue for Super Glossy 180gsm
- Good quality packaging allows the inkjet & photo paper to stand, lie flat or even hang on the rack
- Box packaging for a better protection of content
- Inner plastic packaging with hard cardboard to protect the paper (always kept in good condition)
- The whiter & smoother side is for printing

THERMAL TRANSFER BARCODE RIBBON

Barcode ribbon is not only used to print barcodes, but also numbering, logos, text, symbols, etc. Barcode technologies today have helped businesses to minimise data printing errors, speed up the labelling process and reduce cost.

There are 2 types of barcode printer technologies categorised by the type of print-head:

1. Flat head – for normal speed printing
2. Near edge – for high speed printing

Sono-Roll
Brand Barcode
Ribbon

Compatible barcode printer brands in the market:

- Zebra, Sato, TEC, Argox, Clever (TSC), Godex (Taiwan), Ricoh (Japan), Meto, Monarch (US), Printronix, Datamax, Eltron, Intermec, Protec, Citizen, etc.
- Barcode ribbon specifications depend on printer type

BARCODE RIBBON

WAX TYPE

蜡

Best applied when scratch resistance and durability are not required but cost is the primary concern.

Wax barcode is commonly used for standard applications on a wide variety of label stocks. It is composed of a high percentage of wax based materials with low melting point that reduces printhead energy output, thereby extending the printhead's lifespan.

Common Applications:

- General purpose labels
- Shipping, warehousing and receiving labelling
- Retail tags and label applications
- Ticketing

Common Substrates:

- Uncoated paper tags, coated paper tags and labels

Wax Type	Jumbo Roll Width	Width(W) x Length(L)	KG
WA18-1	890mm	40mm x 300m	0.122
WT36E	890mm	80mm x 300m	0.248
GX4	890mm	110mm x 300m	0.340
WT48-1	890mm		

WAX RESIN TYPE

蜡树脂

Best applied when scratch and smear / mild chemical durability is required.

Wax Resin barcode ribbon is composed of a mixture of both wax and resinous materials that require a higher melting point compared to wax ribbon, making the print out more durable than wax ribbon. Wax Resin barcode ribbon's exceptional print quality is suitable for complex label formats, rotated and 2D barcodes, logos and graphics.

Common Applications:

- Shipping, warehousing and receiving labelling
- Bagging machines
- Medical and pharmaceutical labelling
- Frozen products labels

Common Substrates:

- Coated paper tags and labels
- Polyethylene (PE)
- Polypropylene (PP)

Wax Resin Type	Jumbo Roll Width	Width(W) x Length(L)	***KG
WRX68	890mm	40mm x 300m	0.122

RESIN TYPE

树脂

Used when durability is absolutely needed.

Resin barcode ribbon is designed for harsh environment labelling applications. It provides superior resistance to abrasion, steam, heat and a variety of chemicals including gasoline, alcohol, engine oil, etc.

Common Applications:

- Textiles
- Chemical drum labelling
- Medical and pharmaceutical labelling
- Dry cleaning labels

Common Substrates:

- Polyethylene (PE) and polypropylene (PP)
- Polyester and vinyl

Ultrasound Gel 超声传导凝胶

ULTRASOUND GEL
ACOUSTICALLY PERFECT

260g e Bottle

FEATURES:

- Manufactured with distilled water
- Unique water-based formula suitable for all ultrasound apparatus
- Bacteriostatic (reduces the risk of bacterial contamination)
- Greaseless, odourless and non-staining
- Water soluble (cleans easily with water)
- Hypoallergenic (non-irritating to the skin)
- Tested under accredited lab for every production batch

BCC (Burkholderia cepacia complex) tested by renowned accredited lab using accredited method to ensure our product is safe to use, not BCC-contaminated and free from other harmful microbial

Sonomed Gel Ultrasound gel is perfect for reducing acoustic impedance. It is a water-based gel made from distilled water that is suitable for all ultrasound apparatus. It reduced the air space for the transducer to send the sound wave and receive the reflection back for a precise and clear image.

ECG Gel
传导凝胶

260g e Bottle

Our Sonomed Gel ECG gel is a water-based conductive gel which has been specifically formulated to minimize interference or resistance between the electrodes and the skin. Contained with high conductivity properties which remain constant even during long procedures, our ECG gel helps to ensure a continuous signal flow from the skin to the ECG machine, including transmission of weak electrical signals. Our ECG gel contains harmless ingredients and preservatives that are non-toxic and has passed toxicology test conducted by accredited laboratory. Our ECG gel is suitable to be used with all electrocardiography equipment.

FEATURES:

- Non-irritant, gentle on skin
- Bacteriostatic (reduce risk of bacterial contamination)
- Water soluble
- Easily wiped off with towel or tissue
- Odourless
- Does not stain
- Alcohol free
- Dermatologically tested
- Soft bottle for easy dispensing

BCC (Burkholderia cepacia complex) tested by renowned accredited lab using accredited method to ensure our product is safe to use, not BCC-contaminated and free from other harmful microbial

Cooling Gel Patch

退热凝胶贴片

Cooling Gel Patch For Adult & Kids

Suitable in such situation

- For Fever
- For Sleep
- For Refresh

10 HOURS COOLING!

COOLING MECHANISM

The water contained in the patch absorbs and diffuses heat to achieve constant cooling effect.

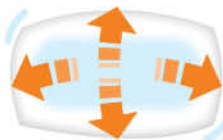

Soft gel makes the good feel of cooling

Cooling effect would continue as long as water contained, even if the patch is warmed up.

EFFORT FOR COMFORTABILITY

Elastic non-woven patch can perfectly fit the attached surface angle

冷却感 密着力 UP
COOL FEELING ADHESIVE STRENGTH

Features

- The hydrogel's cooling effect lasts for about 10 hours, sustaining through the night well into the morning.
- The water contained in the gel absorbs and diffuses heat to achieve the constant cooling effect.
- The hydrophilic polymer utilized in this product is gentle on the skin.
- The gel sheet is mildly acidic, skin-friendly and hypoallergenic.
